

Applying the Skip Navigation Links in the Context of the Websites' Accessibility of Central Public Administration Bodies in the Trenčín Region¹

Jana Koprlová

Abstract: *The study focuses in its main aim on seeking yet undetected or undefined deficits in relation to applying the skip navigation mechanism on the websites of the central public administration bodies in the Trenčín Region in the context of improving the websites accessibility and it consists of two separate parts. The first part presents a basic introduction to the questions of skip navigation links, with the key attention paid to the following three main areas: applying of skip navigation links, visual hiding of skip navigation links, and web browsers' bug related to skip navigation links. The second part of the study concentrates on the basis of analysis of applying the skip navigation links on the websites of the central public administration bodies in the Trenčín Region on the processes focused on detection of potential deficits and gaps in the websites' accessibility or related possible non-compliance with the legislation in force.*

Key Words: *Websites; Websites' Accessibility; Skip Navigation Links; Public Administration; Central Public Administration Bodies; Compliance with Legislation in Force; the Trenčín Region; Analysis.*

Introduction

The on-line form of presentation and communication of the public administration authorities via Internet belongs not only to the most effective forms of communications – in relation to the territorial impact of the communicated information, but also to the most problematic – in the context of technical realization due to a number of specific standards required by handicapped web users with various forms of disabilities. In the following study the author focuses on the questions of applying the skip navigation links as key elements by building the websites.

¹ This study was created within the institutional project of the Faculty of Law of Trnava University in Trnava No. 10/2013 "Websites' Accessibility in Public Administration", in the Slovak original "Prístupnosť webových stránok vo verejnej správe".

While sighted web users use their eyes as a built-in skip navigation mechanism which enables them to bypass several links with only one click or to move directly to the link they want to reach with the mouse, for users with some forms of visual or motor disabilities means bypassing the navigation links or direct browsing the website a very serious technical problem. Importance and wide-social interest in solving this problem is reflected also in the adopted related legislation which is in the Slovak Republic represented by the latest Ministerial Decree of the Ministry of Finance of the Slovak Republic No. 55/2014 Coll. of Standards for Information Systems of Public Administration issued on March 4th, 2014, and effective from March 15th, 2014.²

The aim of the study is to analyze applying the skip navigation links on the websites of the central public administration bodies in the Trenčín Region. In the context of the research questions we define the main hypothesis as follows: *Homepages of the central public administration bodies in the Trenčín Region apply technically correctly the skip navigation links mechanism.*

Skip navigation links

The following part of the study familiarizes the readers with the main questions of applying of skip navigation links, visual hiding of skip navigation links, and web browsers' bug related to skip navigation links.

Applying of skip navigation links

The idea of applying the skip navigation links is simple: they serve to provide a link at the top of the webpage which jumps the user down to an anchor or target at the beginning of the main content. For the most part it seems to be easy, though there is more than one way to accomplish the goal. From the technical view the process of creating the skip navigation link could be explained through a HTML code as it is shown in the following example:³

² See Výnos Ministerstva financií Slovenskej republiky č. 55/2014 Z.z. o štandardoch pre informačné systémy verejnej správy zo 4. marca 2014 [Ministerial Decree of the Ministry of Finance of the Slovak Republic No. 55/2014 Coll. of Standards for Information Systems of Public Administration issued on March 4th, 2014].

Applying the Skip Navigation Links in the Context of the Websites' Accessibility of Central State Administration Bodies in the Slovak Republic. *Societas et iurisprudencia* [online].

✚ HTML code:
<body>
Skip to Main Content
...
<main id="main-content">
<h1>Heading</h1>
<p>This is the first paragraph.</p>.

Visual hiding of skip navigation links

By building the website the most required form of applying the skip navigation mechanism is to make it invisible. For hiding the skip links there are several techniques to be applied. Two parallel conditions should be necessarily taken into account in this process: the first one means the requirement of visual hiding of the skip links content, and the second one represents the requirement of accessibility of the skip links content for screen readers. Nowadays, the best known and most often used CSS code "*visibility: hidden; /display: none;*" satisfies the only first one from the two above-mentioned conditions and so it cannot be recommended in relation to its non-visibility and inaccessibility for screen readers. An effective solution of this problem, satisfying the both conditions, offer the following HTML and CSS codes:⁴

✚ HTML code:
<div class="hidden">This text is hidden.</div>;
✚ CSS code:
.hidden {
position: absolute;
left: -10000px;
top: auto;
width: 1px;
height: 1px;

2014, roč. 2, č. 2, pp. 134-135 [cit. 2015-06-01]. ISSN 1339-5467. Available at: <http://sei.iuridica.truni.sk/archive/2014/02/SOCIETAS-ET-IURISPRUDENTIA-2014-02.pdf>.

⁴ CSS in Action: Invisible Content Just for Screen Reader Users. In: *WebAIM: Web Accessibility in Mind* [online]. 2014-12-11 [cit. 2015-06-01]. Available at: <http://webaim.org/techniques/css/invisiblecontent/>; and KOPRLOVÁ, J. Applying the Skip Navigation Links in the Context of the Websites' Accessibility of Central State Administration Bodies in the Slovak Republic. *Societas et iurisprudencia* [online]. 2014, roč. 2, č. 2, p. 135 [cit. 2015-06-01]. ISSN 1339-5467. Available at: <http://sei.iuridica.truni.sk/archive/2014/02/SOCIETAS-ET-IURISPRUDENTIA-2014-02.pdf>.

```
overflow: hidden;  
}.
```

By generally recommended requirement to make the skip navigation links invisible until they receive keyboard focus, the following HTML and CSS codes should be applied:⁵

✚ HTML code:
`<div id="hidden">Skip to Main Content
</div>;`

✚ CSS code:
`#hidden a {
 position: absolute;
 left: -10000px;
 top: auto;
 width: 1px;
 height: 1px;
 overflow: hidden;
}
#hidden a:focus {
 position: static;
 width: auto;
 height: auto;
}.`

This means a very useful solution which could be preferred above all for sighted keyboard users those cannot use a mouse.

Web browsers' bug related to skip navigation links

The recommended above-mentioned skip navigation links related solutions are working effective in most web browsers, but nowadays there still exists one bug which lowers the efficiency of their applying through disrupting the logical order by browsing or reading the webpage links. This makes the webpage browsing with keyboard distortable or even non-effective. An appropriate solution for healing this bug offers the HTML code as follows:⁶

<body>
Skip to Main Content
...
<main id="main-content" tabindex="-1">
<h1>Heading</h1>
<p>This is the first paragraph.</p>

Analysis of applying the skip navigation links on the websites of the central public administration bodies in the Trenčín Region

Our analysis of applying the skip navigation links on the websites of the central public administration bodies in the Trenčín Region has been legislatively based on the Ministerial Decree of the Ministry of Finance of the Slovak Republic No. 55/2014 Coll. of Standards for Information Systems of Public Administration issued on March 4th, 2014, and effective from March 15th, 2014, with the main attention laid on the § 14 Websites' Accessibility (in the Slovak original "§ 14 Prístupnosť webových stránok"), including related appendix Guideline 13. Providing Clear Navigation Mechanisms (in the Slovak original "Pravidlo 13. Poskytovanie prehľadného mechanizmu navigácie").⁷

Our analysis was realized in the early June 2015 by applying web browser Internet Explorer 11 (with style sheets and active elements turned off). Complete sample was represented by all websites of all the central public administration bodies in the Trenčín Region, while re-

search sample was defined by all homepages of all the central public administration bodies in the Trenčín Region, namely of:⁸

-  Central public administration body of Bánovce nad Bebravou (<http://www.banovce.sk/>);
-  Central public administration body of Ilava (<http://www.ilava.sk/>);
-  Central public administration body of Myjava (<http://www.myjava.sk/>);
-  Central public administration body of Nové Mesto nad Váhom (<http://www.nove-mesto.sk/>);
-  Central public administration body of Partizánske (<http://www.partizanske.sk/>);
-  Central public administration body of Považská Bystrica (<http://www.povazska-bystrica.sk/>);
-  Central public administration body of Prievidza (<http://www.prievidza.sk/>);
-  Central public administration body of Púchov (<http://www.puchov.sk/>);
-  Central public administration body of Trenčín (<http://www.trencin.sk/>).

Central public administration body of Bánovce nad Bebravou

Next figure displays homepage of the central public administration body of Bánovce nad Bebravou, with style sheets and active elements turned off. The analyzed skip link is marked by red rectangle.

Analyzing the homepage of the central public administration body of Bánovce nad Bebravou in context of using the skip navigation links following key findings could be detected:⁹

-  Number of links before the main content: 2 links;
-  Number of skip links: 2 links;
-  Number of links before the first skip link: 0 links;
-  Visual display of skip links: hidden;

⁸ See *Zákon č. 575/2001 Z.z. o organizácii činnosti vlády a organizácii ústrednej štátnej správy v platnom znení* [Act No. 575/2001 Coll. on Organization of the Activities of the Government and Organization of the Central Public Administration, as amended].

⁹ Source code of the central public administration body website of *Bánovce nad Bebravou* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.banovce.sk/>.

HTML code of skip links:

```
<div class="hidden-special">  
  <a href="#m_233815" title="Prechod na navigáciu Hlavné menu">Prechod na navigáciu Hlavné menu</a>  
  <a href="#m_25095" title="Prechod na navigáciu Hlavné menu 2">Prechod na navigáciu Hlavné menu 2</a>  
</div>  
<a name="m_233815"></a>  
<a name="m_25095"></a>;
```

CSS code of skip links:

```
.hidden-special {  
  height: 0;  
  overflow: hidden;  
  margin: 0;  
  padding: 0;  
  border: 0;  
}
```

Figure 1 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Bánovce nad Bebravou

Oficiálne webové sídlo Mesta Bánovce nad Bebravou

BÁNOVCE AKTUÁLNE

[ZUŠ Dezide](#)

Source: Website (with style sheets and active elements turned off) of the central public administration body of *Bánovce nad Bebravou* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.banovce.sk/>.

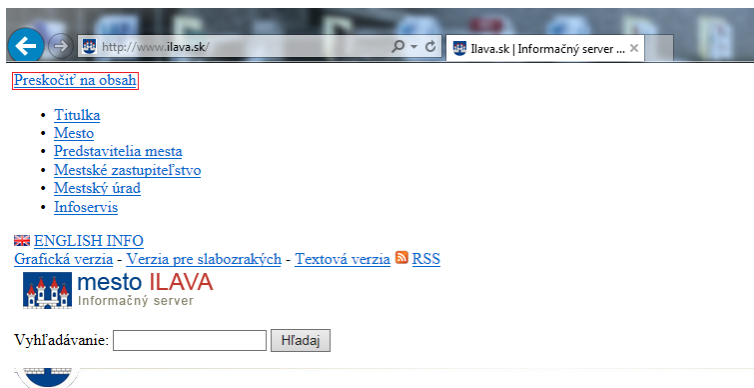

According to the presented results we can conclude that there is a skip navigation mechanism applied on the analyzed homepage of the central public administration body of Bánovce nad Bebravou, but it

works technically incorrectly. In relation to our finding we can recommend to add the attribute *tabindex="-1"* to website's target elements and to replace CSS code *"height: 0;"* with CSS code in accordance with the model examples shown in the previous parts of the study named "Visual hiding of skip navigation links" and "Web browsers' bug related to skip navigation links", with the aim, firstly, to make the skip navigation links content accessible/visible for screen readers and, secondly, to eliminate the disrupted logical order by browsing or reading the webpage links that occurs by most of web browsers.

Central public administration body of Ilava

Next figure displays homepage of the central public administration body of Ilava, with style sheets and active elements turned off. The analyzed skip link is marked by red rectangle.

Figure 2 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Ilava

Source: Website (with style sheets and active elements turned off) of the central public administration body of *Ilava* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.ilava.sk/>.

Analyzing the homepage of the central public administration body of *Ilava* in context of using the skip navigation links following key findings could be detected:¹⁰

¹⁰ Source code of the central public administration body website of *Ilava* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.ilava.sk/>.

- ✚ Number of links before the main content: 17 links;
- ✚ Number of skip links: 1 link;
- ✚ Number of links before the first skip link: 0 links;
- ✚ Visual display of skip links: hidden;
- ✚ HTML code of skip links:

```
<div id="skipToContent">
  <a href="#content">Preskočiť na obsah</a>
</div>
<div id="content">
  ...
</div>
```
- ✚ CSS code of skip links:

```
#skipToContent {
  display: none;
}
```

According to the presented results we can conclude that there is a skip navigation mechanism applied on the analyzed homepage of the central public administration body of Ilava, but it works technically incorrectly. In relation to our finding we can recommend to add the attribute *tabindex="-1"* to website's target element and to replace CSS code *"display: none;"* with CSS code in accordance with the model examples shown in the previous parts of the study named "Visual hiding of skip navigation links" and "Web browsers' bug related to skip navigation links", with the aim, firstly, to make the skip navigation links content accessible/visible for screen readers and, secondly, to eliminate the disrupted logical order by browsing or reading the webpage links that occurs by most of web browsers.

Central public administration body of Myjava

Next figure displays homepage of the central public administration body of Myjava, with style sheets and active elements turned off. There is no skip link applied.

Analyzing the homepage of the central public administration body of Myjava in context of using the skip navigation links following key findings could be detected:¹¹

¹¹ Source code of the central public administration body website of *Myjava* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.myjava.sk/>.

- Number of links before the main content: 2 links;
- Number of skip links: 0 links.

Figure 3 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Myjava

Source: Website (with style sheets and active elements turned off) of the central public administration body of Myjava [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.myjava.sk/>.

According to the presented results we can conclude that there is no skip navigation mechanism applied on the analyzed homepage of the central public administration body of Myjava. In relation to this finding we can recommend to add the skip navigation links in accordance with the model examples shown in the previous part of the study named “Skip navigation links”.

Central public administration body of Nové Mesto nad Váhom

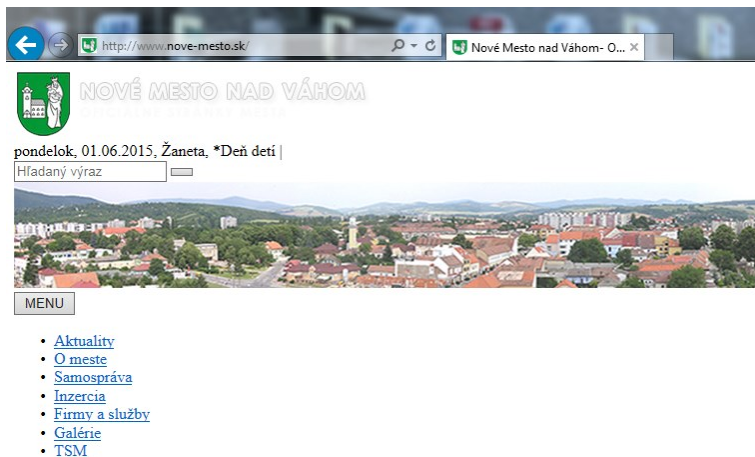

Next figure displays homepage of the central public administration body of Nové Mesto nad Váhom, with style sheets and active elements turned off. There is no skip link applied.

Analyzing the homepage of the central public administration body of Nové Mesto nad Váhom in context of using the skip navigation links following key findings could be detected:¹²

¹² Source code of the central public administration body website of *Nové Mesto nad Váhom* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.nove-mesto.sk/>.

- ✚ Number of links before the main content: 98 links;
- ✚ Number of skip links: 0 links.

Figure 4 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Nové Mesto nad Váhom

```
<div class="hidden-special">
  <a href="#m_9069" title="Prechod na navigáciu Hlavné
menu">Prechod na navigáciu Hlavné menu</a>
</div>
<a name="m_9069"></a>;
```
- CSS code of skip links:

```
.hidden-special {
  height: 0;
  overflow: hidden;
  margin: 0;
  padding: 0;
  border: 0;
}
```

Figure 6 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Považská Bystrica

Mesto Považská Bystrica

Source: Website (with style sheets and active elements turned off) of the central public administration body of *Považská Bystrica* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.povazska-bystrica.sk/>.

According to the presented results we can conclude that there is a skip navigation mechanism applied on the analyzed homepage of the

central public administration body of Považská Bystrica, but it works technically incorrectly. In relation to our finding we can recommend to add the attribute *tabindex="-1"* to website's target element and to replace CSS code *"height: 0;"* with CSS code in accordance with the model examples shown in the previous parts of the study named "Visual hiding of skip navigation links" and "Web browsers' bug related to skip navigation links", with the aim, firstly, to make the skip navigation links content accessible/visible for screen readers and, secondly, to eliminate the disrupted logical order by browsing or reading the webpage links that occurs by most of web browsers.

Central public administration body of Prievidza

Next figure displays homepage of the central public administration body of Prievidza, with style sheets and active elements turned off. The analyzed skip link is marked by red rectangle.

Analyzing the homepage of the central public administration body of Prievidza in context of using the skip navigation links following key findings could be detected:¹⁵

-  Number of links before the main content: 48 links;
-  Number of skip links: 1 link;
-  Number of links before the first skip link: 7 links;
-  Visual display of skip links: hidden;
-  HTML code of skip links:

```
<ul id="accessability">
...
<li>
  <a href="#navigation" accesskey="0">Preskočiť hlavičku webové
prezentácie</a>
</li>
...
</ul>
```
-  CSS code of skip links:

```
[Missing selector id="navigation"];
#accessability {
  position: absolute;
  top: -5000px;
```

¹⁵ Source code of the central public administration body website of *Prievidza* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.prievidza.sk/>.

```
left: -5000px;  
z-index: 1;  
}.
```

Figure 7 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Prievidza

Source: Website (with style sheets and active elements turned off) of the central public administration body of Prievidza [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.prievidza.sk/>.

According to the presented results we can conclude that there is a skip navigation mechanism applied on the analyzed homepage of the central public administration body of Prievidza, but it works technically incorrectly. In relation to our finding we can recommend to move the applied skip navigation link to the top of the website, then to replace element "[Preskočiť hlavičku webovej prezentácie](#navigation)" with element "[Prejsť na obsah stránky](#articles)", to add the attribute *tabindex="-1"* to website's target element and to replace CSS code "*top: -5000px;*" with CSS code in accordance with the model examples shown in the previous parts of the study named "Visual hiding of skip navigation links" and "Web browsers' bug related to skip navigation links", with the aim, firstly, to make the skip navigation links content accessible/visible for screen readers and, secondly, to eliminate the disrupted logical order by browsing or reading the webpage links that occurs by most of web browsers.

Central public administration body of Púchov

Next figure displays homepage of the central public administration body of Púchov, with style sheets and active elements turned off (analyzed homepage is visible and available only with active elements turned on). There is no skip link applied.

Figure 8 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Púchov

Source: Website (with style sheets and active elements turned off) of the central public administration body of Púchov [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.puchov.sk/>.

Analyzing the homepage of the central public administration body of Púchov in context of using the skip navigation links following key findings could be detected:¹⁶

-  Number of links before the main content: 82 links;
-  Number of skip links: 0 links.

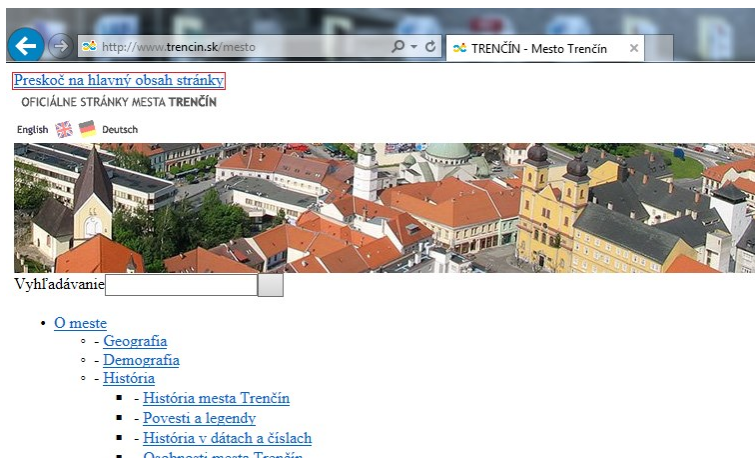

According to the presented results we can conclude that there is no skip navigation mechanism applied on the analyzed homepage of the central public administration body of Púchov. In relation to this finding we can recommend to add the skip navigation links in accordance with the model examples shown in the previous part of the study named “Skip navigation links”.

¹⁶ Source code of the central public administration body website of Púchov [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.puchov.sk/>.

Central public administration body of Trenčín

Next figure displays homepage of the central public administration body of Trenčín, with style sheets and active elements turned off. The analyzed skip link is marked by red rectangle.

Figure 9 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Trenčín

Source: Website (with style sheets and active elements turned off) of the central public administration body of *Trenčín* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.trencin.sk/>.

Analyzing the homepage of the central public administration body of Trenčín in context of using the skip navigation links following key findings could be detected:¹⁷

- ✚ Number of links before the main content: 134 links;
- ✚ Number of skip links: 1 link;
- ✚ Number of links before the first skip link: 0 links;
- ✚ Visual display of skip links: hidden/focusable;
- ✚ HTML code of skip links:

```
<div id="skip">
  <a href="#content">Preskoč na hlavný obsah stránky</a>
</div>
<a name="content"><!-- content --></a>
```

¹⁷ Source code of the central public administration body website of *Trenčín* [online]. 2015 [cit. 2015-06-01]. Available at: <http://www.trencin.sk/>.

✚ CSS code of skip links:

```
#skip a, #skip a:hover, #skip a:visited {  
    position: absolute;  
    left: 0px;  
    top: -500px;  
    width: 1px;  
    height: 1px;  
    overflow: hidden;  
}  
#skip a:active, #skip a:focus {  
    position: static;  
    width: auto;  
    height: auto;  
}.
```

According to the presented results we can conclude that there is a skip navigation mechanism applied on the analyzed homepage of the central public administration body of Trenčín which works technically correctly. In relation to our finding we can recommend to add the attribute *tabindex="-1"* to website's target element and to replace CSS code "*left: 0px; top: -500px;*" with CSS code in accordance with the model examples shown in the previous parts of the study named "Visual hiding of skip navigation links" and "Web browsers' bug related to skip navigation links", with the aim to eliminate the disrupted logical order by browsing or reading the webpage links that occurs by most of web browsers.

Conclusion

In the study "Applying the Skip Navigation Links in the Context of the Websites' Accessibility of Central Public Administration Bodies in the Trenčín Region" we have paid our attention in accordance with its main aim to seeking yet undetected or undefined deficits in relation to applying the skip navigation mechanism on the websites of the central public administration bodies in the Trenčín Region in the context of improving the websites accessibility. In the context of our research questions we defined the main hypothesis as follows: *Homepages of the central public administration bodies in the Trenčín Region apply technically correctly the skip navigation links mechanism.*

According to the results and key findings presented in previous parts of our study we can underline the following final conclusions (valid as of June 1st, 2015), divided in to three separate groups:

Homepages with the technically correctly working skip navigation mechanism – for this group we can recommend to add the attribute *tabindex="-1"* to website's target elements which relates namely to only one central public administration body:

- ✚ Central public administration body of Trenčín.

Homepages with the technically incorrectly working skip navigation mechanism – for this group we can recommend to add the attribute *tabindex="-1"* to website's target elements and to replace CSS code *"display: none;"* with CSS code in accordance with the exactly in our study presented model examples. These recommendations relate to exactly four central public administration bodies:

- ✚ Central public administration body of Bánovce nad Bebravou;
- ✚ Central public administration body of Ilava;
- ✚ Central public administration body of Považská Bystrica;
- ✚ Central public administration body of Prievidza.

Homepages with no skip navigation mechanism applied – for this group we can recommend to add skip navigation links, then to add target elements, to add the attribute *tabindex="-1"* to website's target elements and to avoid applying CSS code *"display: none;"* in accordance with the exactly in our study presented model examples. These recommendations relate namely to four central public administration bodies, which is less than one half of the central public administration bodies in the Trenčín Region:

- ✚ Central public administration body of Myjava;
- ✚ Central public administration body of Nové Mesto nad Váhom;
- ✚ Central public administration body of Partizánske;
- ✚ Central public administration body of Púchov.

Finally, as for verifying the set main hypothesis of the study we can conclude that the hypothesis is not valid, so we have to reject it, because from the 9 analyzed homepages of the central public administration bodies in the Trenčín Region only 1 homepage was technically correctly working and was in compliance with legislation in force¹⁸ (state valid as of June 1st, 2015).
