

Applying the Skip Navigation Links in the Context of the Websites' Accessibility of Central Public Administration Bodies in the Bratislava Region¹

Jana Koprlová

Abstract: *The study focuses in its main aim on seeking yet undetected or undefined deficits in relation to applying the skip navigation mechanism on the websites of the central public administration bodies in the Bratislava Region in the context of improving the websites accessibility and it consists of two separate parts. The first part presents a basic introduction to the questions of skip navigation links, with the key attention paid to the following three main areas: applying of skip navigation links, visual hiding of skip navigation links, and web browsers' bug related to skip navigation links. The second part of the study concentrates on the basis of analysis of applying the skip navigation links on the websites of the central public administration bodies in the Bratislava Region on the processes focused on detection of potential deficits and gaps in the websites' accessibility or related possible non-compliance with the legislation in force.*

Key Words: *Websites; Websites' Accessibility; Skip Navigation Links; Public Administration; Central Public Administration Bodies; Compliance with Legislation in Force; the Bratislava Region; Analysis.*

Introduction

The on-line form of presentation and communication of the public administration authorities via Internet belongs not only to the most effective forms of communications – in relation to the territorial impact of the communicated information, but also to the most problematic – in the context of technical realization due to a number of specific standards required by handicapped web users with various forms of disabilities. In the following study the author focuses on the questions of applying the skip navigation links as key elements by building the websites.

¹ This study was created within the institutional project of the Faculty of Law of Trnava University in Trnava No. 10/2013 "Websites' Accessibility in Public Administration", in the Slovak original "Prístupnosť webových stránok vo verejnej správe".

While sighted web users use their eyes as a built-in skip navigation mechanism which enables them to bypass several links with only one click or to move directly to the link they want to reach with the mouse, for users with some forms of visual or motor disabilities means bypassing the navigation links or direct browsing the website a very serious technical problem. Importance and wide-social interest in solving this problem is reflected also in the adopted related legislation which is in the Slovak Republic represented by the latest Ministerial Decree of the Ministry of Finance of the Slovak Republic No. 55/2014 Coll. of Standards for Information Systems of Public Administration issued on March 4th, 2014, and effective from March 15th, 2014.²

The aim of the study is to analyze applying the skip navigation links on the websites of the central public administration bodies in the Bratislava Region. In the context of the research questions we define the main hypothesis as follows: *Homepages of the central public administration bodies in the Bratislava Region apply technically correctly the skip navigation links mechanism.*

Skip navigation links

The following part of the study familiarizes the readers with the main questions of applying of skip navigation links, visual hiding of skip navigation links, and web browsers' bug related to skip navigation links.

Applying of skip navigation links

The idea of applying the skip navigation links is simple: they serve to provide a link at the top of the webpage which jumps the user down to an anchor or target at the beginning of the main content. For the most part it seems to be easy, though there is more than one way to accomplish the goal. From the technical view the process of creating the skip navigation link could be explained through a HTML code as it is shown in the following example:³

² See *Výnos Ministerstva financií Slovenskej republiky č. 55/2014 Z.z. o štandardoch pre informačné systémy verejnej správy zo 4. marca 2014* [Ministerial Decree of the Ministry of Finance of the Slovak Republic No. 55/2014 Coll. of Standards for Information Systems of Public Administration issued on March 4th, 2014].

³ "Skip Navigation" Links. In: *WebAIM: Web Accessibility in Mind* [online]. 2013-10-25 [cit. 2014-12-01]. Available at: <http://webaim.org/techniques/skipnav/>, and KOPRLOVÁ, J. Applying the Skip Navigation Links in the Context of the Websites' Accessibility of Central State Administration Bodies in the Slovak Republic. *Societas et iurisprudencia* [online].

✚ HTML code:
<body>
Skip to Main Content
...
<main id="main-content">
<h1>Heading</h1>
<p>This is the first paragraph.</p>.

Visual hiding of skip navigation links

By building the website the most required form of applying the skip navigation mechanism is to make it invisible. For hiding the skip links there are several techniques to be applied. Two parallel conditions should be necessarily taken into account in this process: the first one means the requirement of visual hiding of the skip links content, and the second one represents the requirement of accessibility of the skip links content for screen readers. Nowadays, the best known and most often used CSS code "*visibility: hidden; /display: none;*" satisfies the only first one from the two above-mentioned conditions and so it cannot be recommended in relation to its non-visibility and inaccessibility for screen readers. An effective solution of this problem, satisfying the both conditions, offer the following HTML and CSS codes:⁴

✚ HTML code:
<div class="hidden">This text is hidden.</div>
✚ CSS code:
.hidden {
position: absolute;
left: -10000px;
top: auto;
width: 1px;
height: 1px;

2014, roč. 2, č. 2, pp. 134-135 [cit. 2014-12-01]. ISSN 1339-5467. Available at: <http://sei.iuridica.truni.sk/archive/2014/02/SOCIETAS-ET-IURISPRUDENTIA-2014-02.pdf>.

⁴ CSS in Action: Invisible Content Just for Screen Reader Users. In: *WebAIM: Web Accessibility in Mind* [online]. 2013-09-24 [cit. 2014-12-01]. Available at: <http://webaim.org/techniques/css/invisiblecontent/>, and KOPRLOVÁ, J. Applying the Skip Navigation Links in the Context of the Websites' Accessibility of Central State Administration Bodies in the Slovak Republic. *Societas et iurisprudencia* [online]. 2014, roč. 2, č. 2, p. 135 [cit. 2014-12-01]. ISSN 1339-5467. Available at: <http://sei.iuridica.truni.sk/archive/2014/02/SOCIETAS-ET-IURISPRUDENTIA-2014-02.pdf>.

```
overflow: hidden;  
}.
```

By generally recommended requirement to make the skip navigation links invisible until they receive keyboard focus, the following HTML and CSS codes should be applied:⁵

✚ HTML code:
`<div id="hidden">Skip to Main Content
</div>;`

✚ CSS code:
`#hidden a {
 position: absolute;
 left: -10000px;
 top: auto;
 width: 1px;
 height: 1px;
 overflow: hidden;
}
#hidden a:focus {
 position: static;
 width: auto;
 height: auto;
}.`

This means a very useful solution which could be preferred above all for sighted keyboard users those cannot use a mouse.

Web browsers' bug related to skip navigation links

The recommended above-mentioned skip navigation links related solutions are working effective in most web browsers, but nowadays there still exists one bug which lowers the efficiency of their applying through disrupting the logical order by browsing or reading the webpage links. This makes the webpage browsing with keyboard distortable or even non-effective. An appropriate solution for healing this bug offers the HTML code as follows:⁶

<main id="main-content" tabindex="-1">
<h1>Heading</h1>
<p>This is the first paragraph.</p>

Analysis of applying the skip navigation links on the websites of the central public administration bodies in the Bratislava Region

Our analysis of applying the skip navigation links on the websites of the central public administration bodies in the Bratislava Region has been legislatively based on the Ministerial Decree of the Ministry of Finance of the Slovak Republic No. 55/2014 Coll. of Standards for Information Systems of Public Administration issued on March 4th, 2014, and effective from March 15th, 2014, with the main attention laid on the § 14 Websites' Accessibility (in the Slovak original "§ 14 Prístupnosť webových stránok"), including related appendix Guideline 13. Providing Clear Navigation Mechanisms (in the Slovak original "Pravidlo 13. Poskytovanie prehľadného mechanizmu navigácie").⁷

Our analysis was realized in the early December 2014 by applying web browser Internet Explorer 11 (with style sheets and active elements turned off). Complete sample was represented by all websites of all the central public administration bodies in the Bratislava Region, while re-

search sample was defined by all homepages of all the central public administration bodies in the Bratislava Region, namely of:⁸

- ✚ Central public administration body of Bratislava – Staré Mesto (<http://www.staremesto.sk/>);
- ✚ Central public administration body of Bratislava – Ružinov (<http://www.ruzinov.sk/>);
- ✚ Central public administration body of Bratislava – Nové Mesto (<http://www.banm.sk/>);
- ✚ Central public administration body of Bratislava – Karlova Ves (<http://www.karlovaves.sk/>);
- ✚ Central public administration body of Bratislava – Petržalka (<http://www.petrzalka.sk/>);
- ✚ Central public administration body of Malacky (<http://www.malacky.sk/>);
- ✚ Central public administration body of Pezinok (<http://www.pezinok.sk/>);
- ✚ Central public administration body of Senec (<http://www.senec.sk/>).

Central public administration body of Bratislava – Staré Mesto

Next figure displays homepage of the central public administration body of Bratislava – Staré Mesto, with style sheets and active elements turned off. There is no skip link applied.

Analyzing the homepage of the central public administration body of Bratislava – Staré Mesto in context of using the skip navigation links following key findings could be detected:⁹

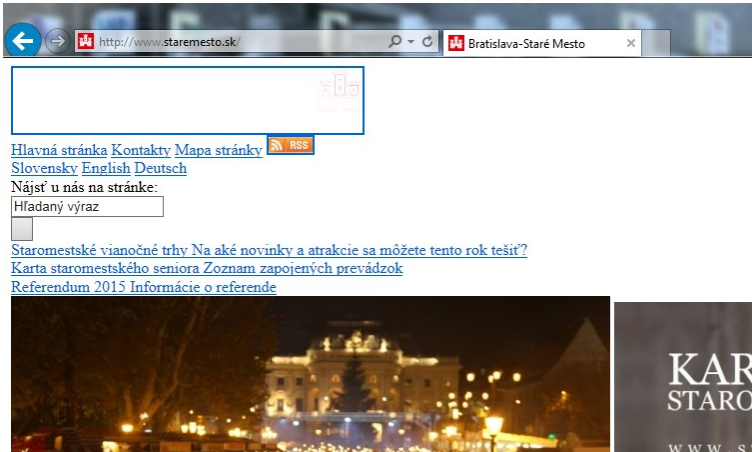

- ✚ Number of links before the main content: 75 links;
- ✚ Number of skip links: 0 links.

According to the presented results we can conclude that there is no skip navigation mechanism applied on the analyzed homepage of the central public administration body of Bratislava – Staré Mesto. In relation to this finding we can recommend to add the skip navigation links in accordance with the model examples shown in the previous part of the study named “Skip navigation links”.

⁸ See *Zákon č. 575/2001 Z.z. o organizácii činnosti vlády a organizácii ústrednej štátnej správy v platnom znení* [Act No. 575/2001 Coll. on Organization of the Activities of the Government and Organization of the Central Public Administration, as amended].

Central public administration body of Bratislava – Ružinov

Next figure displays homepage of the central public administration body of Bratislava – Ružinov, with style sheets and active elements turned off. The analyzed skip link is marked by red rectangle.

Analyzing the homepage of the central public administration body of Bratislava – Ružinov in context of using the skip navigation links following key findings could be detected:¹⁰

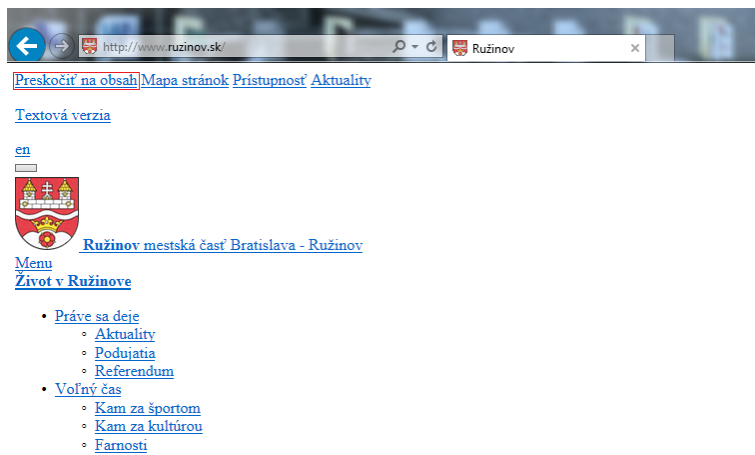

- ✚ Number of links before the main content: 147 links;
- ✚ Number of skip links: 1 link;
- ✚ Number of links before the first skip link: 0 links;
- ✚ Visual display of skip links: hidden;
- ✚ HTML code of skip links:

```
<a href="/sk/Home/index#main" title="Preskočiť na obsah"
class="sr-only" accesskey="s">Preskočiť na obsah</a>
<div class="left-column" id="main" role="main">
```

¹⁰ Source code of the central public administration body website of Bratislava – Ružinov [online]. 2014 [cit. 2014-12-01]. Available at: <http://www.ruzinov.sk/>.

```
...
</div>;
CSS code of skip links:
.sr-only {
    position: absolute;
    width: 1px;
    height: 1px;
    margin: -1px;
    padding: 0;
    overflow: hidden;
    clip: rect(0 0 0 0);
    border: 0;
}
```

Figure 2 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Bratislava – Ružinov

Source: Website (with style sheets and active elements turned off) of the central public administration body of Bratislava – Ružinov [online]. 2014 [cit. 2014-12-01]. Available at: <http://www.ruzinov.sk/>.

According to the presented results we can conclude that there is a skip navigation mechanism applied on the analyzed homepage of the central public administration body of Bratislava – Ružinov which works technically correctly. In relation to our finding we can recommend to add the attribute `tabindex="-1"` to website's target element in accordance with the model example shown in the previous part of the study named "Web browsers' bug related to skip navigation links", with the aim to

eliminate the disrupted logical order by browsing or reading the webpage links that occurs by most of web browsers.

Central public administration body of Bratislava – Nové Mesto

Next figure displays homepage of the central public administration body of Bratislava – Nové Mesto, with style sheets and active elements turned off. The analyzed skip link is marked by red rectangle.

Figure 3 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Bratislava – Nové Mesto

Source: Website (with style sheets and active elements turned off) of the central public administration body of Bratislava – Nové Mesto [online]. 2014 [cit. 2014-12-01]. Available at: <http://www.banm.sk/>.

Analyzing the homepage of the central public administration body of Bratislava – Nové Mesto in context of using the skip navigation links following key findings could be detected:¹¹

- ✚ Number of links before the main content: 137 links;
- ✚ Number of skip links: 5 links;
- ✚ Number of links before the first skip link: 7 links;
- ✚ Visual display of skip links: hidden;
- ✚ HTML code of skip links:
`<ul id="skratky" class="hide">`

¹¹ Source code of the central public administration body website of Bratislava – Nové Mesto [online]. 2014 [cit. 2014-12-01]. Available at: <http://www.banm.sk/>.

```
...
<li>
  <a href="#page" accesskey="0">Skočiť na obsah</a>
</li>
<li>
  <a href="#topmenu">Skočiť na hlavné menu</a>
</li>
<li>
  <a href="#left">Skočiť na ľavý informačný blok</a>
</li>
<li>
  <a href="#right">Skočiť na pravý informačný blok</a>
</li>
<li>
  <a href="#user-menu">Skočiť na užívateľské menu</a>
</li>
</ul>
<div id="topmenu">
  ...
</div>
<div id="left">
  ...
</div>
<div id="page">
  ...
</div>
<div id="right">
  ...
</div>
<div id="user-menu" class="menu menu2">
  ...
</div>;
```

 CSS code of skip links:

```
.hide {
  display: none;
}.
```

According to the presented results we can conclude that there is a skip navigation mechanism applied on the analyzed homepage of the central public administration body of Bratislava – Nové Mesto, but it

works technically incorrectly. In relation to our finding we can recommend to move the applied skip navigation links to the top of the website, then to add the attribute *tabindex="-1"* to website's target elements and to replace CSS code "*display: none;*" with CSS code in accordance with the model examples shown in the previous parts of the study named "Visual hiding of skip navigation links" and "Web browsers' bug related to skip navigation links", with the aim, firstly, to make the skip navigation links content accessible/visible for screen readers and, secondly, to eliminate the disrupted logical order by browsing or reading the webpage links that occurs by most of web browsers.

Central public administration body of Bratislava – Karlova Ves

Next figure displays homepage of the central public administration body of Bratislava – Karlova Ves, with style sheets and active elements turned off. The analyzed skip link is marked by red rectangle.

Analyzing the homepage of the central public administration body of Bratislava – Karlova Ves in context of using the skip navigation links following key findings could be detected:¹²

- ✚ Number of links before the main content: 54 links;
- ✚ Number of skip links: 1 link;
- ✚ Number of links before the first skip link: 0 links;
- ✚ Visual display of skip links: hidden/focusable;
- ✚ HTML code of skip links:

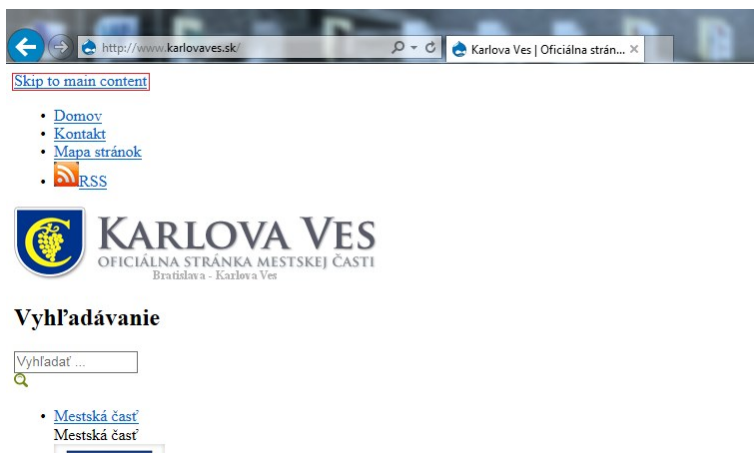

```
<div id="skip-link">
  <a href="#" class="element-invisible element-focusable">Skip to
  main content</a>
</div>
<a id="main-content"></a>
```
- ✚ CSS code of skip links:

```
.element-invisible {
  position: absolute !important;
  clip: rect(1px 1px 1px 1px);
  clip: rect(1px,1px,1px,1px);
  overflow: hidden;
  height: 1px;
}
```

¹² Source code of the central public administration body website of *Bratislava – Karlova Ves* [online]. 2014 [cit. 2014-12-01]. Available at: <http://www.karlovaves.sk/>.

```
.element-invisible.element-focusable:active,
.element-invisible.element-focusable:focus {
    position: static !important;
    clip: auto;
    overflow: visible;
    height: auto;
}
.element-invisible {
    margin: 0;
}.
```

Figure 4 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Bratislava – Karlova Ves

Source: Website (with style sheets and active elements turned off) of the central public administration body of Bratislava – Karlova Ves [online]. 2014 [cit. 2014-12-01]. Available at: <http://www.karlovaves.sk/>.

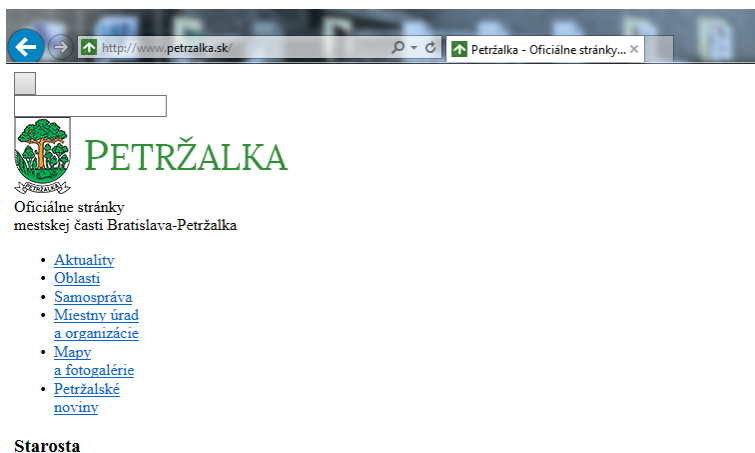

According to the presented results we can conclude that there is a skip navigation mechanism applied on the analyzed homepage of the central public administration body of Bratislava – Karlova Ves, but it works technically incorrectly. In relation to our finding we can recommend to replace element “*Skip to main content*” with element “*Prejsť na obsah stránky*” and to add the attribute *tabindex="-1"* to website's target element in accordance with the model example shown in the previous part of the study named “Web browsers’ bug related to skip navigation

links”, with the aim to eliminate the disrupted logical order by browsing or reading the webpage links that occurs by most of web browsers.

Central public administration body of Bratislava – Petržalka

Next figure displays homepage of the central public administration body of Bratislava – Petržalka, with style sheets and active elements turned off. There is no skip link applied.

Figure 5 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Bratislava – Petržalka

cordance with the model examples shown in the previous part of the study named "Skip navigation links".

Central public administration body of Malacky

Next figure displays homepage of the central public administration body of Malacky, with style sheets and active elements turned off. The analyzed skip link is marked by red rectangle.

Figure 6 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Malacky

Source: Website (with style sheets and active elements turned off) of the central public administration body of *Malacky* [online]. 2014 [cit. 2014-12-01]. Available at: <http://www.malacky.sk/>.

Analyzing the homepage of the central public administration body of Malacky in context of using the skip navigation links following key findings could be detected:¹⁴

-  Number of links before the main content: 100 links;
-  Number of skip links: 3 links;
-  Number of links before the first skip link: 0 links;
-  Visual display of skip links: hidden;
-  HTML code of skip links:
`Preskočiť na obsah`

¹⁴ Source code of the central public administration body website of *Malacky* [online]. 2014 [cit. 2014-12-01]. Available at: <http://www.malacky.sk/>.

```
<a href="#content" class="skip">Preskočiť na obsah</a>  
<a href="#content" class="skip">Preskočiť na obsah</a>  
<a href="#top" class="skip">Preskočiť na vrch</a>  
<a name="top"></a>  
<a name="content"></a>;
```

✚ CSS code of skip links:

```
.skip {  
  display: none;  
}.
```

According to the presented results we can conclude that there is a skip navigation mechanism applied on the analyzed homepage of the central public administration body of Malacky, but it works technically incorrectly. In relation to our finding we can recommend to move the applied skip navigation link to the top of the website, then to add the attribute *tabindex="-1"* to website's target elements and to replace CSS code *"display: none;"* with CSS code in accordance with the model examples shown in the previous parts of the study named "Visual hiding of skip navigation links" and "Web browsers' bug related to skip navigation links", with the aim, firstly, to make the skip navigation links content accessible/visible for screen readers and, secondly, to eliminate the disrupted logical order by browsing or reading the webpage links that occurs by most of web browsers.

Central public administration body of Pezinok

Next figure displays homepage of the central public administration body of Pezinok, with style sheets and active elements turned off. There is no skip link applied.

Analyzing the homepage of the central public administration body of Pezinok in context of using the skip navigation links following key findings could be detected:¹⁵

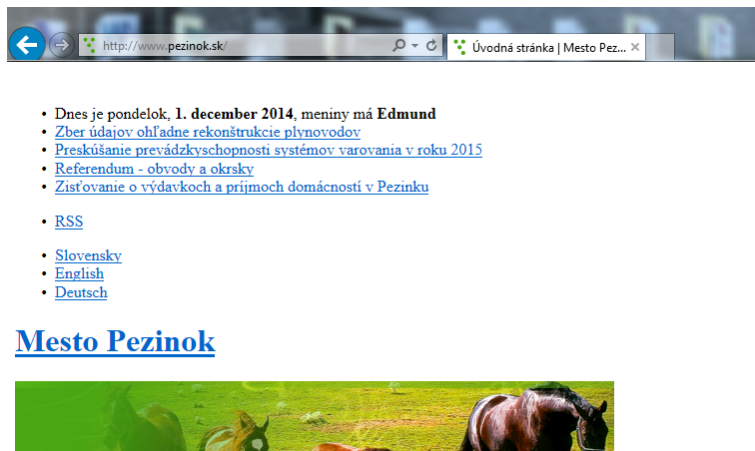

- ✚ Number of links before the main content: 39 links;
- ✚ Number of skip links: 0 links.

According to the presented results we can conclude that there is no skip navigation mechanism applied on the analyzed homepage of the central public administration body of Pezinok. In relation to this finding

¹⁵ Source code of the central public administration body website of *Pezinok* [online]. 2014 [cit. 2014-12-01]. Available at: <http://www.pezinok.sk/>.

we can recommend to add the skip navigation links in accordance with the model examples shown in the previous part of the study named “Skip navigation links”.

Figure 7 Website (with style sheets and active elements turned off) of the Central Public Administration Body of Pezinok

Conclusion

In the study “Applying the Skip Navigation Links in the Context of the Websites’ Accessibility of Central Public Administration Bodies in the Bratislava Region” we have paid our attention in accordance with its main aim to seeking yet undetected or undefined deficits in relation to applying the skip navigation mechanism on the websites of the central public administration bodies in the Bratislava Region in the context of improving the websites accessibility. In the context of our research questions we defined the main hypothesis as follows: *Homepages of the central public administration bodies in the Bratislava Region apply technically correctly the skip navigation links mechanism.*

According to the results and key findings presented in previous parts of our study we can underline the following final conclusions (valid as of December 1st, 2014), divided in to three separate groups:

Homepages with the technically correctly working skip navigation mechanism – for this group we can recommend to add the attribute *tabindex="-1"* to website's target elements which relates namely to only one central public administration body:

- ✚ Central public administration body of Bratislava – Ružinov.

Homepages with the technically incorrectly working skip navigation mechanism – for this group we can recommend to add the attribute *tabindex="-1"* to website's target elements and to replace CSS code "*display: none;*" with CSS code in accordance with the exactly in our study presented model examples. These recommendations relate namely to only three central public administration bodies:

- ✚ Central public administration body of Bratislava – Nové Mesto;
- ✚ Central public administration body of Bratislava – Karlova Ves;
- ✚ Central public administration body of Malacky.

Homepages with no skip navigation mechanism applied – for this group we can recommend to add skip navigation links, then to add target elements, to add the attribute *tabindex="-1"* to website's target elements and to avoid applying CSS code "*display: none;*" in accordance with the exactly in our study presented model examples. These recommendations relate namely to four central public administration bodies, which is exactly one half of the central public administration bodies in the Bratislava Region:

- ✚ Central public administration body of Bratislava – Staré Mesto;
- ✚ Central public administration body of Bratislava – Petržalka;
- ✚ Central public administration body of Pezinok;
- ✚ Central public administration body of Senec.

Finally, as for verifying the set main hypothesis of the study we can conclude that the hypothesis is not valid, so we have to reject it, because from the 8 analyzed homepages of the central public administration bodies in the Bratislava Region only 1 homepage was technically correctly working and was in compliance with legislation in force¹⁷ (state valid as of December 1st, 2014).
